

How to allow miMove Google sign-in for your School

This guide explains how a Google Workspace Administrator can allow teachers and students to sign in to miMove using their school Google account.

Time required: ~2 minutes

Who can do this: Google Workspace Super Admin or Security Admin

Step 1: Sign in to Google Admin Console

1. Open: <https://admin.google.com>
2. Sign in using a Google Workspace Admin account

Step 2: Open API Access Controls

1. From the left menu, go to: Security
2. Click Access and data control
3. Select API controls

Step 3: Manage App Access Control

1. Under App access control, click Manage third-party app access
2. Click Add app
3. Choose OAuth App Name or Client ID

Step 4: Add miMove OAuth Client ID

1. Select Client ID
2. Paste the miMove OAuth Client ID (provided below)
3. Click Search
4. Select miMove
5. Click Continue

Step 5: Set App Status to Trusted

1. Choose Trusted
2. Apply access to: All users (Recommended)
3. Click Finish

Step 6: Confirm Access

miMove is now approved.

Teachers and students can sign in using Sign in with Google.

Changes usually take effect immediately (may take up to 10 minutes).

Why This Is Required

Your school uses Google Workspace security controls that require administrator approval before third-party apps can access Google accounts. miMove follows Google's recommended OAuth and privacy standards.
